1. NATURE OF OPERATIONS AND GOING CONCERN

Golden Arrow Resources Corporation (the "Company" or "We") was incorporated on September 22, 2015, under the Business Corporations Act in the province of British Columbia. The address of the Company's registered office is Suite 312 – 837 West Hastings Street, Vancouver, BC, Canada V6C 3N6.

The Company was incorporated to facilitate the restructuring required to be able to carry out the transaction described in Note 3. On May 31, 2017, the then sole shareholder of the Company, Golden Arrow ("GAR"), closed the agreement entered into on September 30, 2015 with, among others, SSR Mining Inc. ("SSRM"), forming a joint venture combining the Chinchillas project with the producing Pirquitas mine into a new operation, Puna Operations Inc. ("POI"). Upon closing of the agreement, the Company acquired a 25% interest in POI and in accordance with the terms of the plan of arrangement, each shareholder of GAR received one common share in the capital of the Company (a "New GAR Share") in exchange for each common share of GAR (the "GAR Shares") held. On May 31, 2017, the Company changed its name to Golden Arrow Resources Corporation (formerly 1049708 B.C. Ltd.), and began trading on the TSX-V under the symbol "GRG".

The Company is a natural resource company engaged in the acquisition, exploration and development of resource properties in South America. The Company's mineral property interests presently have no proven or probable reserves other than within the Investment in POI and, on the basis of information to date, it has not yet determined whether these properties contain economically recoverable resources. The recoverability of amounts shown for mineral property interests are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves, and upon future profitable production.

The Company has experienced recurring operating losses and has an accumulated deficit of $19,391,874 (Retained earnings of $16,612,236 as at December 31, 2018) and shareholders' equity of $39,010,097 (As at December 31, 2018 – $38,329,391) as at March 31, 2019. In addition, the Company has positive working capital of $497,701 as at March 31, 2019 (Negative working capital of $7,987 as at December 31, 2018) and negative cash flow from operating activities of $1,108,042 (March 31, 2018 – $1,846,233). Working capital is defined as current assets less current liabilities and provides a measure of the Company's ability to settle liabilities that are due within one year with assets that are also expected to be converted into cash within one year. These factors create material uncertainties that may cast significant doubt about the Company's ability to continue as a going concern. The Company's continued operations, as intended, are dependent upon its ability to raise additional funding to meet its obligations and commitments and to attain profitable operations. Management's plan in this regard is to raise equity financing as required to further fund its share of planned capital expenditures for its investment in POI and working capital. Management's plan in this regard is to raise additional funding as required. There are no assurances that the Company will be successful in achieving these goals. These condensed consolidated interim financial statements do not include adjustments to the amounts and classifications of assets and liabilities and reported expenses that might be necessary should the Company be unable to continue as a going concern, which could be material.

These condensed consolidated interim financial statements were approved by the Board of Directors of the Company on May 29, 2019.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are set out below.

a) Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as applicable to interim financial reports including International Accounting Standards 34 'Interim Financial Reporting'.

b) Basis of presentation

These condensed consolidated interim financial statements have been prepared on a continuity of interest basis once the plan of arrangement referred to in Note 3 occurred. The plan of arrangement has been determined to be a capital reorganization and is excluded from the scope of IFRS 3 – Business Combinations.

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for marketable securities, which are carried at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

c) Changes in Accounting Standards

The International Accounting Standards Board ("IASB") has issued new and amended standards and interpretations which have not yet been adopted by the Company. The following is a brief summary of the new and amended standards and interpretations:

IFRS 16 specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. The standard was issued in January 2016 and is effective for annual periods beginning on or after January 1, 2019. The Company's current operating lease commitments are disclosed in Note 13.

The adoption of the following accounting standards had no significant impact on the consolidated financial statements. These standards are:

IFRS 16 – *Leases*

d) Basis of consolidation

These condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned subsidiaries.

	Place of Incorporation	Principal Activity
IMPSA Resources Corporation	BC, Canada	Holding company
New Golden Explorations Inc.	BC, Canada	Holding company
New Golden Explorations Atlantida Ltd.	BC, Canada	Holding company
New Golden Explorations Indiana Ltd.	BC, Canada	Holding company
New Golden Explorations Indiana Chile SpA	Chile	Exploration company
New Golden Explorations Chile SpA	Chile	Exploration company
Lucca Sociedad Anonima S.A.	South America	Exploration company
Desarrollo de Recursos S.A.	Argentina	Exploration company

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Inter-company balances and transactions, including unrealized income and expenses arising from inter-company transactions, are eliminated in preparing the financial statements.

(i) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

(ii) Investments in joint venture

Investments in joint venture are accounted for using the equity method. They are initially recognized at cost, which includes transaction costs. Subsequent to initial recognition, the financial statements include the Company's share of the profit or loss of the equity accounted for investees until the date on which significant influence or joint control ceases. At each period end, the carrying amount of equity-accounted investments is assessed for impairment. An impairment loss is recognized for the amount that which the assets carrying amount exceeds its recoverable amount. The recoverable amount is higher of an assets fair value less cost of disposal and value in use.

Significant Accounting Estimates and Judgments

These consolidated financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at year end that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to the following:

(i) Critical accounting estimates

- The net carrying value of each mineral property is reviewed regularly for conditions that suggest impairment. This review requires significant judgment. Factors considered in the assessment of asset impairment include, but are not limited to, whether there has been a significant adverse change in the legal, regulatory, accessibility, title, environmental or political factors that could affect the property's value; whether there has been an accumulation of costs significantly in excess of the amounts originally expected for the property's acquisition, development or cost of holding; and whether exploration activities produced results that are not promising such that no more work is being planned in the foreseeable future. If impairment is determined to exist, a formal estimate of the recoverable amount is performed and an impairment loss is recognized to the extent that the carrying amount exceeds the recoverable amount.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(ii) Critical accounting judgments

- Presentation of the consolidated financial statements which assumes that the Company will continue in operation for the foreseeable future, obtain additional financing as required, and will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due.

- The analysis of the functional currency for each entity of the Company. In concluding that the Canadian dollar is the functional currency of the parent and its subsidiary companies, management considered the currency that mainly influences the cost of providing goods and services in each jurisdiction in which the Company operates. As no single currency was clearly dominant the Company also considered secondary indicators including the currency in which funds from financing activities are denominated and the currency in which funds are retained.

- The Company accounts for its investment in joint venture on an equity method basis and, at each period end, management is required to make an assessment as to whether there are indicators of impairment that would require the Company to test the investment for impairment. If indicators of impairment exist, the Company would be required to determine the net recoverable amount which is based on expected cash flows to be earned from the investment or fair value of the investment less cost to sell. Management has determined that there were no indicators of impairment as at March 31, 2019.

- The initial recognition of the fair value of the Company's investment in joint venture upon completion of the Plan of Arrangement described in Note 3 has been identified as an accounting policy which involves judgments or assessments made by management. We have accounted for this transaction as a disposition of subsidiaries in exchange for an investment in a joint venture. The fair value of our Investment in POI has been measured using a discounted cash flow model based on our best estimate of what inputs a market participant would consider appropriate. Key assumptions included commodity prices, reserves and resources, operating and capital costs and discount, foreign exchange and inflation rates. A change to these inputs would alter the value of our Investment in POI and the gain that we have recognized on close of this transaction.

- Management is required to assess impairment in respect to the Company's mineral property interests. The triggering events are defined in IFRS 6. In making the assessment, management is required to make judgments on the status of each project and the future plans towards finding commercial reserves. Management has determined that there were no indicators of impairment as at March 31, 2019.

- The determination of our tax expense for the period and deferred tax assets and liabilities involves significant estimation and judgement by management. In determining these amounts, we interpret tax legislation in a variety of jurisdictions and make estimates of the expected timing of the reversal of deferred tax assets and liabilities. We also make estimates of future earnings which affect the extent to which potential future tax benefits may be used. We are subject to assessments by various taxation authorities, which may interpret legislation differently. These differences may affect the final amount or the timing of the payment of taxes. We provide for such differences where known based on our best estimate of the probable outcome of these matters.

(Expressed in Canadian Dollars Unless Otherwise Noted)

3. PLAN OF ARRANGEMENT

Under the terms of the Agreement, POI acquired from SSRM, all of the issued and outstanding securities of MP LLC which indirectly holds title to the Pirquitas mine (also located in the Jujuy province of Argentina), with the effect that upon completion of the Arrangement, the then existing shareholders of GAR, as holders of the Company's shares, have exposure through the Company's 25% interest in POI to the Pirquitas mine and Chinchillas property.

In consideration for granting SSRM the rights to conduct an 18-month period (June 2017 – December 2018) of pre-development activities at Chinchillas ("the Preliminary Period"), SSRM paid GAR $2,000,000 on completion of certain milestones as detailed below:

Payment	Milestone
$500,000	Signing of the transaction agreements
500,000	Receipt of shareholder approval
500,000	Six month anniversary of shareholder approval or date of election to proceed with the joint venture
500,000	Twelve month anniversary of shareholder approval or date of election to proceed with the joint venture
$2,000,000	

All of the payments were received by GAR during the Preliminary Period.

Upon vesting by SSRM, the Agreement specified that an amount equal to 25% of the Pirquitas mine's cash equivalent earnings, if any, during the Preliminary Period, less certain expenditures for exploration (including pre-development expenditures), capital investment and closure costs as based on a pre-defined formula (the "Pirquitas Payment"), was payable on closing of the transaction.

On May 31, 2017, the Company closed the Arrangement as outlined above. Upon closing of the transaction, the Company received $17.8 million for the Pirquitas Payment for the period October 1, 2015 until May 31, 2017.

The total purchase price was allocated to the carrying value of the net assets disposed of pursuant to the plan of arrangement. The Company recognized a gain upon business transaction of its investment in POI as follows:

		May 31, 2017
Pirquitas payment	$	17,810,756
Fair value of investment in POI		31,983,236
Total Consideration received	$	49,793,992

(Expressed in Canadian Dollars Unless Otherwise Noted)

4. INVESTMENT IN PUNA OPERATIONS JOINT VENTURE

On March 31, 2017, SSRM exercised its option on the Chinchillas project and on May 31, 2017, SSRM and the Company formed POI for the development of the property. The jointly owned company, holding the Pirquitas and Chinchillas properties is owned 75% by SSRM and 25% by the Company with SSRM as the operator. The Company is liable for contribution of 25% of the required funding for capital expenditures and working capital purposes of POI when requested by POI.

The following is the summarized financial information for POI as at May 31, 2017:

		May 31, 2017
Current assets	$	97,728,114
Non-current assets		155,285,282
Current liabilities		(39,895,147)
Non-current liabilities		(85,185,303)
Net assets	$	127,932,946

The Company accounts for its interest in POI using the equity method. At May 31, 2017, the Company recognized an investment in POI of $31,983,236 representing the fair value of the Company's 25% interest.

The following table summarizes the change in investment in POI for the three months ended March 31, 2019 and twelve-month period ended December 31, 2018:

Balance, December 31, 2017	$	33,702,015
Equity contributions to POI		19,793,348
Company's share of comprehensive loss of POI, net of tax		(8,089,968)

7. CREDIT FACILITY

On July 6, 2018, the Company entered into a credit facility agreement with SSRM for a non-revolving term loan in an aggregate principal amount equal to US$10,000,000. The loan matures on July 22, 2020, the date which is 24 months from the first delivery of ore from Puna Operations' Chinchillas property to the Pirquitas mill. Refer to Note 16 for credit facility agreement covenants.

The proceeds borrowed under the credit facility are required to be used by the Company to fund its contributions under the shareholders' agreement the Company entered into with SSRM on May 31, 2017, as the sole shareholders of POI. The loan is secured by the Company's ownership and equity interests in POI.

The credit facility bears interest (computed on the basis of the actual number of days elapsed over a year of 365 days and compounded monthly) at a rate per annum equal to 10% plus the US Base Rate, defined as, the greatest of: (i) the rate of interest per annum calculated on the basis of 365 day year, established by Canadian banks from time to time as a reference rate for the determination of interest rates that such Canadian banks charge to customers of varying degrees of creditworthiness for US dollar loans made by them in Canada; (ii) the Federal Funds Rate for such day or, if such day is not a Business Day, on the immediately preceding Business Day, plus 1.00% per annum; and (iii) LIBOR rate for a period of 1 month on such day (or, in respect of any day that is not a Business Day, such Libor in effect on the immediately preceding Banking Day) plus 1.00% per annum. Interest on the loan shall accrue from and including the date of each borrowing under the credit facility, compounded monthly, and shall be capitalized and payable on the maturity date.

As at March 31, 2019, the Company has drawn USD $10,000,000 (CAD $13,363,000) of the credit facility, and accrued USD $434,155 (CAD $585,206) interest due on maturity. Interest has been calculated using the US base rate of 5.75%, established by Canadian banks for US dollar loans made by the banks in Canada, plus 10%.

10. RELATED PARTY BALANCES AND TRANSACTIONS

On June 1, 2017, the Company entered into a Management Services Agreement ("Agreement") with Grosso Group to provide services and facilities to the Company. Grosso Group is a private company that is owned by an officer and director of the Company and also has another director in common with the Company. Grosso Group provides its member companies with administrative and management services. The member companies pay monthly fees to Grosso Group on a cost recovery basis. The fee is based upon a pro-rating of Grosso Group's costs including its staff and overhead costs among the member companies. This fee is reviewed and adjusted quarterly based on the level of services required.

The Agreement contains termination and early termination fees in the event the services are terminated by the Company. The termination fee includes three months of compensation and any contractual obligations that Grosso Group undertook for the Company, up to a maximum of $750,000. The early termination fees are the aggregate of the termination fee in addition to the lesser of the monthly fees calculated to the end of the term and the monthly fees calculated for eighteen months, up to a maximum of $1,000,000.

(i) Management Services Agreement

Grosso Group provides its member companies with administrative and management services. The member companies pay monthly fees to Grosso Group on a cost recovery basis. The fee is based upon a pro-rating of Grosso Group's costs including its staff and overhead costs among the member companies. The current monthly fee is $43,195 per month. This fee is reviewed and adjusted quarterly based on the level of services required. The agreement expires on December 31, 2020 and is automatically renewed for additional terms of two years unless otherwise terminated pursuant to the terms of the agreement.

(ii) Office Leases

The Company entered into office lease agreements for terms of two and three years. The Company has the option to renew the leases at the time of expiry for additional terms of three and four years.

15. FINANCIAL INSTRUMENTS

The Company examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks. These risks may include credit risk, liquidity risk, currency risk, and interest rate risk. Where material, these risks are reviewed and monitored by the Board of Directors.

(a) Fair Values

The Company's financial assets and liabilities are measured and recognized according to a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities and the lowest priority to unobservable inputs. The three levels of fair value hierarchy are as follows:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 – Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The Company's financial assets consist of cash and cash equivalents, amounts receivable and investments. Investments are carried at fair value and measured as per Level 1 hierarchy. Fair value is determined using closing prices at the balance sheet date with any gains or losses recognized in other comprehensive income. The carrying values of cash and cash equivalents, receivables, and accounts payable and accrued liabilities approximate their fair values due to the short-term maturity of these financial instruments. The fair values of borrowings are not materially different to their carrying amounts, since the interest payable on borrowings is close to current market rates.

15. FINANCIAL INSTRUMENTS (continued)

An analysis of investments including related gains and losses during the period is as follows:

	Three months ended March 31, 2019 $	2018 $
Investments, beginning of period	1,732	312,378
Unrealized (loss) gain included in other comprehensive income	96	(124,239)
Investments, end of period	1,828	188,139

(b) Financial Instrument Risk Exposure

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist of cash, and amounts receivable.

Overall the Company's credit risk has not changed significantly from the prior year. The Company places its cash and cash equivalents and short-term investments with financial institutions with high credit ratings, the credit risk is minimal.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has in place a planning and budgeting process to help determine the funds required to ensure the Company has the appropriate liquidity to meet its operating and growth objectives. The Company has historically relied on issuance of shares and warrants to fund exploration programs and may require doing so again in the future. See Note 1 for further information.

	1 Year $	More than 1 Year $
Accounts payable and accrued liabilities	351,658	-
Credit facility	-	13,363,000
Interest payable – credit facility	-	585,206

Market risk

(i) Currency risk

Financial instruments that impact the Company's net earnings or other comprehensive income due to currency fluctuations include cash accounts, amounts receivable and accounts payable in: US dollars and Argentine Pesos. The sensitivity of the Company's net earnings and other comprehensive income to changes in the exchange rate between the Canadian dollar and the United States dollar and between the Canadian dollar and the Argentine Peso at March 31, 2019 is summarized as follows:

15. FINANCIAL INSTRUMENTS (continued)

- A 10% change in the US dollar exchange rate relative to the Canadian dollar would change the Company's net loss by $1,086,000.

- A 10% change in the Argentinean peso exchange rate relative to the Canadian dollar would change the Company's net loss by $1,700.

(ii) *Interest rate risk*

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Cash bears no interest and short-term investments are redeemable at any time without penalty, with interest paid from the date of purchase. The fair value of cash and short-term investments approximate their carrying values due to the immediate or short-term maturity of these financial instruments.

Other current financial assets and liabilities are not exposed to interest rate risk except for credit facility which is impacted by variable market rate interest. 1% change in annualised interest rate would impact net loss by approximately $38,000.

16. CAPITAL MANAGEMENT

The Company's objectives when managing capital are:

- To safeguard our ability to continue as a going concern in order to develop and operate our current projects
- Pursue strategic growth initiatives; and
- To maintain a flexible capital structure which lowers the cost of capital.

In assessing our capital structure, we include in our assessment the components of shareholders' equity and loans. In order to facilitate the management of capital requirements, the Company prepares annual expenditure budgets and continuously monitor and review actual and forecasted cash flows. The annual and updated budgets are monitored and approved by the Board of Directors. To maintain or adjust the capital structure, the Company may, from time to time, issue new shares, issue new debt, repay debt or dispose of non-core assets. The Company's current capital resources are insufficient to carry out our exploration plans and support operations through the current operating period. The Company is dependent upon the ability to raise additional funding to meet its obligations and commitments.

Financial Covenants

In connection with the Credit Facility, the Company is restricted from making investments in exploration projects in excess of USD$1,000,000. As at March 31, 2019, the Company was in compliance with these covenants. The Company will monitor these expenditures on an ongoing basis and make necessary adjustments to comply with this Credit Facility covenant.

17. Subsequent Events

Loan Payable

- A subsidiary of the Company, New Golden Explorations, borrowed $137,000 from a non-arm's length lender, that is to be used for working capital. The principal balance of the loan is due and payable in full on demand.
