The accompanying notes are an integral part of these condensed consolidated interim financial statements.

1. NATURE OF OPERATIONS AND GOING CONCERN

Golden Arrow Resources Corporation (the "Company" or "Golden Arrow") was incorporated on July 7, 2004, as a result of a corporate restructuring plan completed by Kobex Minerals Inc. (formerly IMA Exploration Inc.). The address of the Company's registered office is Suite 411 – 837 West Hastings Street, Vancouver, BC, Canada V6C 3N6. The Company is listed on the TSX Venture Exchange.

The Company is a natural resource company engaged in the acquisition and exploration of resource properties in Argentina and Chile. The Company's mineral property interests presently have no proven or probable reserves and, on the basis of information to date, it has not yet determined whether these properties contain economically recoverable resources. Consequently, the Company considers itself to be an exploration stage company.

The amounts shown as mineral property interests represent costs incurred to date, less option payment proceeds and amounts amortized and/or written off, and do not necessarily represent present or future values. The underlying value of the mineral property interests is entirely dependent on the existence of economically recoverable reserves, securing and maintaining title and beneficial interest in the properties, the ability of the Company to obtain the necessary financing to advance the properties beyond the exploration stage, and future profitability of the properties.

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to interim financial statements and to a going concern, which assume that the Company will realize its assets and discharge its liabilities in the normal course of business for the foreseeable future.

The Company has experienced recurring operating losses and has an accumulated deficit of $33,787,855 at March 31, 2016. In addition, the Company has a working capital deficiency of $646,696 at March 31, 2016 and negative cash flow from operating activities of $901,332 for the three months ended March 31, 2016. Working capital is defined as current assets less current liabilities and provides a measure of the Company's ability to settle liabilities that are due within one year with assets that are also expected to be converted into cash within one year. These matters create material uncertainties that may cast significant doubt about the Company's ability to continue as a going concern. The Company's continued operations, as intended, are dependent upon its ability to raise additional funding to meet its obligations and commitments (Note 10) and to attain profitable operations. Management's plan in this regard is to raise equity financing as required. There are no assurances that the Company will be successful in achieving these goals. These condensed consolidated interim financial statements do not include adjustments to the amounts and classifications of assets and liabilities and reported expenses that might be necessary should the Company be unable to continue as a going concern, which could be material.

2. SIGNIFICANT ACCOUNTING POLICIES

Statement of compliance

These interim condensed consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as applicable to interim financial reports including International Accounting Standard 34 'Interim Financial Reporting'.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

These interim condensed consolidated financial statements do not include all the information and note disclosures required by IFRS for annual financial statements and should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2015, which have been prepared in accordance with IFRS, as issued by the International Accounting Standards Board ("IASB") and included in Part 1 of the Handbook of the Chartered Professional Accountants of Canada. The policies applied in these interim condensed financial statements are the same as those applied in the most recent annual consolidated financial statements and were consistently applied to all the periods presented unless otherwise noted.

These interim condensed consolidated financial statements were approved by the Board of Directors of the Company on May 30, 2016.

Basis of presentation

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for marketable securities classified as available-for-sale and as fair value through profit and loss, as well as share purchase warrants classified as fair value through profit and loss that have been measured at fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Basis of consolidation

These condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned subsidiaries as follows:

	Place of Incorporation	Principal Activity
IMPSA Resources Corporation	BC, Canada	Holding company
1049708 B.C. Ltd.	BC, Canada	Holding company
Valle Del Cura S.A.	Argentina	Exploration company
Desarrollo de Recursos S.A.	Argentina	Exploration company
Golden Arrow Chile Ltda.	Chile	Exploration company

Inter-company balances and transactions, including unrealized income and expenses arising from inter-company transactions, are eliminated in preparing the consolidated financial statements.

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

Significant Accounting Estimates and Judgments

The preparation of these condensed consolidated interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

These condensed consolidated interim financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at year end that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to the following:

Critical accounting estimates

i. The net carrying value of each mineral property is reviewed regularly for conditions that suggest impairment. This review requires significant judgment. Factors considered in the assessment of asset impairment include, but are not limited to, whether there has been a significant adverse change in the legal, regulatory, accessibility, title, environmental or political factors that could affect the property's value; whether there has been an accumulation of costs significantly in excess of the amounts originally expected for the property's acquisition, development or cost of holding; and whether exploration activities produced results that are not promising such that no more work is being planned in the foreseeable future. If impairment is determined to exist, a formal estimate of the recoverable amount is performed and an impairment loss is recognized to the extent that the carrying amount exceeds the recoverable amount.

Critical accounting judgments

i. Presentation of the condensed consolidated interim financial statements which assumes that the Company will continue in operation for the foreseeable future, obtain additional financing as required, and will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due.

ii. The determination of categories of financial assets and financial liabilities has been identified as an accounting policy which involves judgments or assessments made by management.

iii. The analysis of the functional currency for each entity of the Company. In concluding that the Canadian dollar is the functional currency of the parent and its subsidiary companies, management considered the currency that mainly influences the cost of providing goods and services in each jurisdiction in which the Company operates. As no single currency was clearly dominant the Company also considered secondary indicators including the currency in which funds from financing activities are denominated and the currency in which funds are retained.

iv. Management is required to assess impairment in respect to the Company's intangible mineral property interests. The triggering events are defined in IFRS 6. In making the assessment, management is required to make judgments on the status of each project and the future plans towards finding commercial reserves.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

New Accounting Standards and Interpretations

The International Accounting Standards Board ("IASB") has issued new and amended standards and interpretations which have not yet been adopted by the Company. The following is a brief summary of the new and amended standards and interpretations:

IFRS 9 – Financial Instruments

IFRS 9 addresses the classification, measurement and recognition of financial assets and financial liabilities. In July 2014 IFRS 9, Financial Instruments ("IFRS 9") was issued. The completed standard provides revised guidance on the classification and measurement of financial assets. It also introduces a new expected credit loss model for calculating impairment for financial assets. This final version of IFRS 9 will be effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. IFRS 9 is not expected to have a material impact on amounts recorded in the financial statements of the Company.

IFRS 15 – Revenue from Contracts with Customers

IFRS 15 is effective for annual periods beginning on or after January 1, 2018. IFRS 15 specifies how and when to recognize revenue as well as requires entities to provide users of financial statements with more informative, relevant disclosures. The standard supersedes IAS 18, Revenue, IAS 11, Construction Contracts, and a number of revenue-related interpretations. The new standard will apply to nearly all contracts with customers: the main exceptions are leases, financial instruments and insurance contracts. IFRS 15 is not expected to have a material impact on amounts recorded in the financial statements of the Company.

IFRS 16 – Leases

IFRS 16 specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. The standard was issued in January 2016 and is effective for annual periods beginning on or after January 1, 2019.

3. MINERAL PROPERTY INTERESTS (continued)

(a) Chinchillas, Jujuy, Argentina

On August 3, 2011, the Company announced an option agreement ("Option Agreement") with a private group to acquire a 100% interest in the Chinchillas Silver Project located in Jujuy Province. On July 11, 2014, the Option Agreement for the Chinchillas Silver Project was amended to allow for an extension of the 3rd year option payment in consideration for USD $6,000 paid monthly until the remaining USD $250,000 was paid. The Company had the option at any time during the period to pay the remaining 3rd year option payment of USD $250,000 without incurring any additional monthly amounts.

Under the terms of the Option Agreement, Golden Arrow acquired a 100% interest in the Chinchillas project on July 21, 2015 by making cash payments to the vendor totaling USD $1,866,000 over four years, as shown below:

Option Payment USD $	Year
20,000	2011
230,000	2012
250,000	2013
180,000	2014
1,186,000	2015
1,866,000	

Furthermore, the Company must make an additional payment of USD $1,200,000 to the vendor upon the commencement of commercial production.

On September 30, 2015, the Company entered into an agreement (the “Agreement”) with Silver Standard Resources Inc. (“Silver Standard”) to jointly develop the Chinchillas project and an agreement to combine the producing Pirquitas Mine and the Chinchillas project into a single new joint venture.

Subject to an 18-month period of pre-development activities (the "Preliminary Period"), Silver Standard will have the right to commence an arrangement (the “Arrangement”) that will see the Pirquitas Mine and the Chinchillas project combined into a 75% Silver Standard 25% Golden Arrow jointly owned mining business, with Silver Standard assuming the role of operator. The Arrangement received shareholder approval on December 16, 2015 and court approval on December 18, 2015.

During the Preliminary Period, Silver Standard will pay Golden Arrow up to CDN$2,000,000 on completion of certain milestones as detailed below, and invest up to an estimated US$12,600,000, with a minimum expenditure commitment of US$4,000,000, at Chinchillas to advance the project and evaluate the feasibility of developing a combined operation.

Payment	Milestone
500,000	Signing of the transaction agreements
500,000	Receipt of shareholder approval
500,000	Six month anniversary of shareholder approval or date of election to proceed with the joint venture
500,000	Twelve month anniversary of shareholder approval or date of election to proceed with the joint venture
2,000,000	

(Expressed in Canadian Dollars Unless Otherwise Noted)

3. MINERAL PROPERTY INTERESTS (continued)

If Silver Standard elects to proceed with the Arrangement the Company will be paid an amount equal to 25% of the Pirquitas mine's cash equivalent earnings, if any, during the Preliminary Period, less certain expenditures for exploration (including pre-development expenditures), capital investment and closure costs incurred during the Preliminary Period, based on a pre-defined formula, payable on closing of the Arrangement.

12. FINANCIAL INSTRUMENTS AND CAPITAL MANAGEMENT

The Company thoroughly examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks. These risks may include credit risk, liquidity risk, currency risk, and interest rate risk. Where material, these risks are reviewed and monitored by the Board of Directors.

(a) Fair Values

The Company's financial assets consist of cash and cash equivalents, amounts receivable and investments. For investments classified as available for sale, fair value is determined using closing prices at the balance sheet date with any temporary unrealized gains or losses recognized in other comprehensive income. For investments classified as fair value through profit or loss, fair value is determined using closing prices at the balance sheet date with any unrealized gain or loss recognized in profit or loss.

The following table outlines the Company’s financial assets and liabilities measured at fair value by level within the fair value hierarchy described below. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

At March 31, 2016 the Company’s financial instruments measured at fair value are as follows:

		Level 1 $	Level 2 $	Level 3 $
	Carrying amount March 31, 2016	Fair value March 31, 2016		
Recurring measurements				
Financial Assets				
Investments	3,080	3,080	-	-

At December 31, 2015 the Company’s financial instruments measured at fair value are as follows:

		Level 1 $	Level 2 $	Level 3 $
	Carrying amount December 31, 2015	Fair value December 31, 2015		
Recurring measurements				
Financial Assets				
Investments	453,803	453,803	-	-

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 – Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

Unrealized (loss) gain included in other comprehensive income	(1,155)	(1,925)
Investments, end of period	3,080	319,913

(b) Financial Instrument Risk Exposure

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist of cash, amounts receivable and exploration funding receivable. The majority of the Company's receivables result from exploration funding for expenses incurred and are with a reputable mining company in good standing.

Overall the Company's credit risk has not changed significantly from the prior year. The Company places its cash and cash equivalents and short-term investments with financial institutions with high credit ratings, the credit risk is minimal.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has in place a planning and budgeting process to help determine the funds required to ensure the Company has the appropriate liquidity to meet its operating and growth objectives. The Company has historically relied on issuance of shares and warrants to fund exploration programs and may require doing so again in the future. See Note 1 for further information.

The Company has $1,802,676 in accounts payable and accrued liabilities that are due within one year of the date of the statement of financial position.

Market risk

(i) Currency risk

Financial instruments that impact the Company's net earnings or other comprehensive income due to currency fluctuations include: US dollars and Argentine Pesos, all denominated in cash, amounts receivable, exploration funding receivable, accounts payable, loan payable and interest payable. The sensitivity of the Company's net earnings and other comprehensive income to changes in the exchange rate between the Canadian dollar and the United States dollar and between the Canadian dollar and the Argentine Peso at March 31, 2016 is summarized as follows:

12. FINANCIAL INSTRUMENTS AND CAPITAL MANAGEMENT (continued)

- A 10% change in the US dollar exchange rate relative to the Canadian dollar would change the Company's net loss by $138,907.
- A 10% change in the Argentinean peso exchange rate relative to the Canadian dollar would change the Company's net loss by $102,041.

(ii) *Interest rate risk*

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Cash bears no interest and short-term investments are redeemable at any time without penalty, with interest paid from the date of purchase. The fair value of cash and short-term investments approximate their carrying values due to the immediate or short-term maturity of these financial instruments.

Other current financial assets and liabilities are not exposed to interest rate risk because they are non-interest bearing or have prescribed interest rates.
