JOHN GAMMON, PHD,
Director

Golden Arrow Resources Corporation is a mining exploration company creating value by making precious and base metal discoveries and advancing them into exceptional deposits. Golden Arrow is a member of the Grosso Group, a management company with a track record of discovery in South America as well as success in monetizing of assets, and the capital markets transactions.

SAN PIETRO COPPER - GOLD - IRON - COBALT PROJECT IN CHILE

INFERRED MINERAL RESOURCE ESTIMATE + UPSIDE POTENTIAL

492 Mt @ 0.41% CuEq (0.23% Cu, 0.05 g/t Au, 99 ppm Co, 14.43% Fe)

Including 2.5 Billion Pounds of Copper & 770,000 oz of Gold

(See Table and notes on reverse)

- ✓ Loosely drilled - opportunities to upgrade category and increase grade with more drilling
- ✓ Open for expansion in several directions
- ✓ Multiple drill-ready targets for new resources
- ✓ +21,000 hectare property largely under-explored

Right Location:

- ✓ Large property crossed by highway and powerline
- ✓ Strategically located central to new district of producing & emerging IOCG mines and projects

Strategic Metals Opportunity:

- ✓ High copper-cobalt targets situated in midst of the new MVSD Copper-Cobalt district, a potential new cobalt production jurisdiction

MULTIPLE DISCOVERY OPPORTUNITIES IN ARGENTINA

- Actively exploring several projects with discovery potential
- Additional projects under JV with new exploration programs imminent

San Pietro Copper-Gold-Iron-Cobalt (IOCG) Project, Chile

Inferred Mineral Resource Estimate for Rincones & Colla Deposits at San Pietro Property

Reported within US\$4.80/lb Cu Pitshell at 0.30% CuEq Cut-off. Qualified Persons: Susan Lomas, P.Geo. & Dr. Bruce Davis, PhD, FAusIMM.
Effective: January 24, 2025. Supporting Technical Report dated April 2, 2025, filed on SEDAR+.

Class	Oxide	Tonnes Mt	Average Grade					Contained Metal				
			CuEq %	Cu %	Au g/t	Co ppm	Fe %	CuEq Mlb	Cu Mlb	Au Koz	Co Mlb	Fe Blb
Inferred	Oxide	83	0.42	0.23	0.06	96	14.80	759	415	150	17	27
Inferred	Sulphide	410	0.41	0.23	0.05	99	14.35	3,686	2,055	620	90	130
Inferred	All	492	0.41	0.23	0.05	99	14.43	4,444	2,470	770	107	157

1. In-Situ Mineral Resources are constrained within a pit shell developed using metal prices of US\$4.80/lb Cu, US\$2,300/oz Au, US\$1 5/lb Co and US\$110/lb Fe, mining costs of US\$2.50/t, processing and G&A costs of US\$9.46/t, metallurgical recoveries of 90% Cu, 65% Au, 80% Co and 40% Fe and an average pit slope of 45 degrees.
2. CuEq values are based on copper, gold, cobalt and iron values using metal prices of US\$4.10/lb Cu, US\$2,500/oz Au, US\$15/lb Co and US\$105/lb Fe and metallurgical recovery values of 90% for Cu, 65% for Au, 80% for Co and 40% for Fe. The resulting formula is $CuEq = Cu\% + (Au/g \times 0.705) + (Co\% \times 3.252) + (Fe\% \times 0.008)$. The cut-off grade for reporting the mineral resources within the pitshell is 0.30% CuEq using total costs of US\$18/t.
3. The block model was classed into Inferred Mineral Resources for blocks with two drill holes within 400m.
4. Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. There is no certainty that all or any part of the Mineral Resources will be converted into Mineral Reserves.
5. Mineral Resources in the Inferred category have a lower level of confidence than that applied to Indicated mineral resources, and, although there is sufficient evidence to imply geologic grade and continuity, these characteristics cannot be verified based on the current data. It is reasonably expected that the majority of Inferred mineral resources could be upgraded to Indicated mineral resources with continued exploration.
6. Totals in the table may not add up precisely due to rounding differences.

Multiple opportunities to expand Rincones & Colla deposits and test sparsely / undrilled targets

>50% of the property remains untested

Q1 2025: MINERAL RESOURCE ESTIMATE & NI 43-101 REPORT (COMPLETE)

Q1 - Q2 2025: DRILL TARGETING (UNDERWAY)

Q3 2025: PHASE 3 DRILL PROGRAM (PLANNED PENDING FUNDING)
