GROSSO GROUP MEMBER COMPANY

# Cautionary Notes

---

This presentation contains forward-looking statements. Generally, forward-looking statements can be identified by the use of terminology such as “anticipate”, “will”, “expect”, “may”, “continue”, “could”, “estimate”, “forecast”, “plan”, “potential” and similar expressions. Forward-looking statements address future events and conditions and therefore involve inherent risks and uncertainties. All statements, other than statements of historical fact, that address activities, events or developments management of the Company believes, expects or anticipates will or may occur in the future, including, without limitation, statements about the Company’s plans for its mineral properties; the Company’s business strategy, plans and outlooks; the future financial or operating performance of the Company; and future exploration and operating plans are forward-looking statements.

Forward-looking statements are subject to a number of risks and uncertainties that may cause the actual results of the Company to differ materially from those discussed in the forward-looking statements and, even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on, the Company. Accordingly, readers should not place undue reliance on the forward-looking statements. Factors that could cause actual results or events to differ materially from current expectations include, among other things: risks and uncertainties related to the ability to obtain, amend, or maintain licenses, permits, or surface rights; risks associated with technical difficulties in connection with exploration activities; risk that the Company will not be able to raise sufficient funds to carry out its business plans, and the risk of political uncertainties and regulatory or legal changes that might interfere with the Company’s business and prospects. There may be other factors that cause results or events to not be as anticipated. Actual results may differ materially from those currently anticipated in such statements. Readers are encouraged to refer to the Company’s Management’s Discussion and Analysis for a more detailed discussion of factors that may impact expected future results. The forward-looking statements contained in this press release are made as of the date hereof or the dates specifically referenced in this press release, where applicable. The Company undertakes no obligation to publicly update or revise any forward-looking statements, unless required pursuant to applicable laws. All forward-looking statements contained in this presentation are expressly qualified by this cautionary statement.

Readers are further cautioned that results from other companies, including properties proximal to those controlled by Golden Arrow, are not necessarily indicative of expected Golden Arrow results.

The contents of this presentation have been reviewed and approved Mr. Brian McEwen, P.Geol., VP Exploration and Development of the Company and a Qualified Person as defined in National Instrument 43-101.

Reported intervals are core lengths and true thickness has not been estimated at this time.

# Investment Highlights

## A Proven Team Creating Value From Assets

Our team has decades of experience & demonstrated success in:

- Deposit Discovery
- Asset transactions
- Corporate finance & capital markets
- Government & Community relations

## Initial Cu-Au Resource at Project with Multi-Deposit Potential

In just 2 years of exploration we have a baseline Inferred mineral resource estimate: **2.5 billion lbs of copper & 770,000 oz of gold\*** in two deposits covering a small fraction of the San Pietro Copper-Gold-Iron-Cobalt Project: a large advanced exploration property in Chile central to a new IOCG mining & exploration district.

## An Active Exploration Project Pipeline

We are continually evaluating and exploring projects for our next resource opportunity. We have active programs within our 100% held portfolio of +125,000 hectares in Argentina, plus at our projects under option, with a focus on gold & base metal properties in key mining and exploration belts.

\*492Mt grading 0.23% Cu, 0.05 g/t Au, 14.43% Fe & 99 ppm Co in the Inferred category. See Slide 13 and Technical Report on SEDAR+ Dated April 2, 2025 for details.

# Proven Team

**Nikolaos Cacos, M.I.M.**  
**CEO & PRESIDENT,**  
**DIRECTOR**

**Joseph Grosso**  
**CHAIRMAN**

**David Terry, Ph.D., P.Geo.**  
**DIRECTOR**

**John Gammon, Ph.D.**  
**DIRECTOR**

**Brian McEwen, P. Geol.**  
**VP EXPLORATION &**  
**DEVELOPMENT**

**Pompeyo Gallardo**  
**VICE PRESIDENT**

**Darren Urquhart,**  
**C.P.A., C.A.**  
**CHIEF FINANCIAL OFFICER**

**Connie Norman**  
**CORPORATE**  
**SECRETARY**

**Hugo Caranza**  
**CHIEF GEOLOGIST**

# Major Group Successes

*Golden Arrow is a member of the Grosso Group - a resource-focused management group that pioneered the mineral exploration industry in Argentina and has operated there since 1993.*

*Headed by Joseph Grosso, the group has been involved with five exceptional mineral deposit discoveries and transactions and has a highly-regarded track record for fostering strong relationships with communities and governments wherever it works.*

GROSSO GROUP

# Flagship Project Vision

Following the sale of its Chinchillas project, the Company set out to **Identify, Advance and Monetize** a second major discovery and value-creation project.

## Criteria:

Strategic location in a reliable **jurisdiction** close to existing mining and new discoveries

Proximal to major **infrastructure** and local amenities

Under-explored property with advanced targets & **multi-deposit potential**

**Commodity opportunities**, such as battery metals

# Introducing: **The SAN PIETRO Project**

- **COPPER**
- **GOLD**
- **IRON OXIDE**
- **COBALT**

**ATACAMA, CHILE**

- +21,000 hectares of exploration & exploitation concessions
- Operated by Chilean subsidiary New Golden Explorations Inc ("NGE") owned 75% Golden Arrow / 25% private company Sociedad de Servicios Andinos SpA (see [NR dated 1/12/24](#))

# JURISDICTION & INFRASTRUCTURE

## AN ACTIVE MINING AREA

- 100 km from the mining centre of Copiapo
- Area hosts all major iron oxide-copper-gold ("IOCG") deposits in Chile
- San Pietro is between a producing IOCG operation and several IOCG mining & exploration projects
  - Toll plants for Cu recovery within 20km, via highway
  - Deep water port within 35 km, via highway

# JURISDICTION & INFRASTRUCTURE

EXCELLENT SUPPORT FOR PROJECT DEVELOPMENT

~8 km from town of Diego de Almagro;  
good logistic support

Easy year-round access: low altitude;  
extensive secondary roads

Rincones deposit area

Paved highway & 2 powerlines  
cross the property (550 & 22KV)

# COMMODITY OPPORTUNITIES

## COPPER & GOLD OPPORTUNITY: SURGE IN PRICES

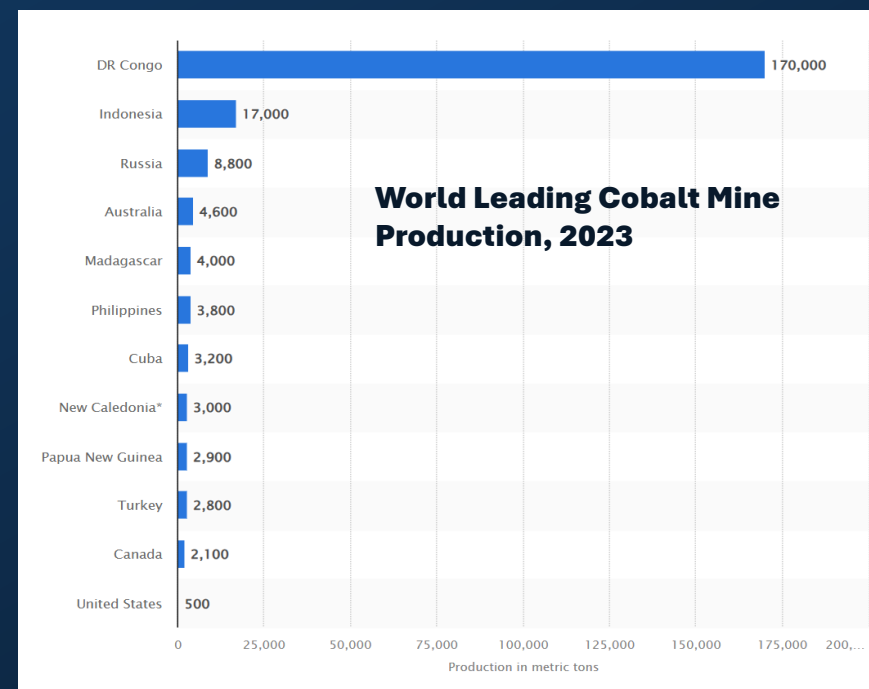

&

## COBALT LONG-TERM VALUE-ADD OPPORTUNITY: LI-BATTERY COMPONENT WITH LIMITED WESTERN SUPPLY

*“The potential of cobalt production in Chile has been underappreciated for decades ... projections for demand growth suggest that it could triple in size by 2030 mainly due to the development of electromobility.”*

*Edgar Blanco, Chile’s mining ministry undersecretary.*

**CAPSTONE TO ADVANCE COBALT PROJECT AT SANTO DOMINGO TO FEASIBILITY; OPPORTUNITY TO BUILD A VERTICALLY INTEGRATED COBALT BUSINESS IN CHILE**

Charts from [dailymetalprice.com](https://dailymetalprice.com) @ May 9, 2025

# IOCG+Co MINERALIZATION

## MODELS AND EXAMPLES AT SAN PIETRO

- Mineralization in: Sub-horizontal mantos with iron oxide (magnetite) and copper, plus gold & cobalt in pyrite; Sub-vertical breccias & veins with iron oxide (specularite) associated with copper (chalcopyrite)
- K-feldspar & chlorite alteration, some calcite association
- Similarities to Santo Domingo IOCG Deposit

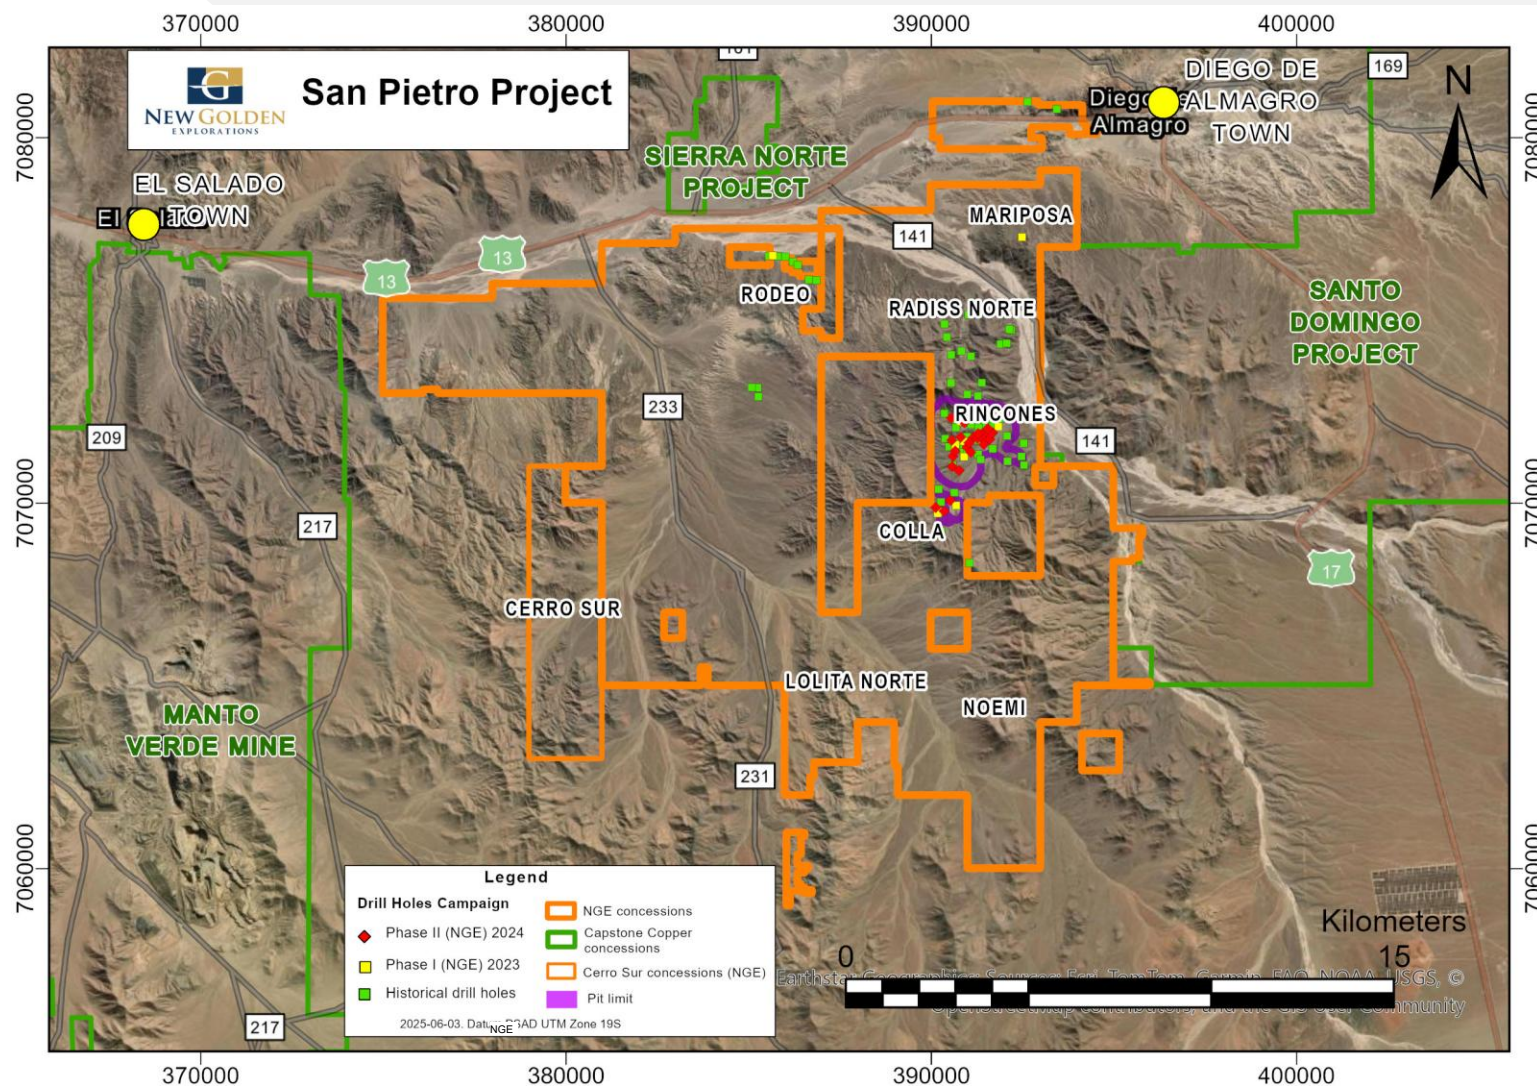

# MULTI DEPOSIT POTENTIAL

- Rincones deposit has been the main focus to date**
  - Over 30,000m of drilling but at relatively wide spacing
  - Similar IOCG mineralization to other major local deposits, including mantos and breccias with Cu, Au, Fe & Co
- Second deposit, Colla, adjacent to Rincones and included in the resource estimate**
  - A smaller, generally higher-grade Co & Fe target
- Opportunities to expand both deposits
- Multiple additional targets for identifying more deposits & building resources
  - Limited exploration to date
  - > 50% of the massive property untested

# RINCONES & COLLA DEPOSITS: INITIAL RESOURCE ESTIMATE

COMPLETED IN 2025, PROVIDES A BASELINE FOR EXPLORATION & GROWTH

- Robust model built using cost parameters from nearby established development project
- A "snapshot" valuation after just 2 years of exploration drilling

## Inferred Mineral Resource Estimate for Rincones & Colla Deposits at San Pietro Property

Reported within US\$4.80/lb Cu Pitshell at 0.30% CuEq Cut-off. Qualified Persons: Susan Lomas, P.Geo. & Dr. Bruce Davis, PhD, FAusIMM.  
Effective: January 24, 2025. Supporting Technical Report dated April 2, 2025, filed on SEDAR+.

Class	Oxide	Tonnes Mt	Average Grade					Contained Metal				
			CuEq %	Cu %	Au g/t	Co ppm	Fe %	CuEq Mlb	Cu Mlb	Au Koz	Co Mlb	Fe Blb
Inferred	Oxide	83	0.42	0.23	0.06	96	14.80	759	415	150	17	27
Inferred	Sulphide	410	0.41	0.23	0.05	99	14.35	3,686	2,055	620	90	130
<b>Inferred</b>	<b>All</b>	<b>492</b>	<b>0.41</b>	<b>0.23</b>	<b>0.05</b>	<b>99</b>	<b>14.43</b>	<b>4,444</b>	<b>2,470</b>	<b>770</b>	<b>107</b>	<b>157</b>

1. In-Situ Mineral Resources are constrained within a pit shell developed using metal prices of US\$4.80/lb Cu, US\$2,300/oz Au, US\$15/lb Co and US\$110/lb Fe, mining costs of US\$2.50/t, processing and G&A costs of US\$9.46/t, metallurgical recoveries of 90% Cu, 65% Au, 80% Co and 40% Fe and an average pit slope of 45 degrees.
2. CuEq values are based on copper, gold, cobalt and iron values using metal prices of US\$4.10/lb Cu, US\$2,500/oz Au, US\$15/lb Co and US\$105/lb Fe and metallurgical recovery values of 90% for Cu, 65% for Au, 80% for Co and 40% for Fe. The resulting formula is  $CuEq = Cu\% + (Au\%/t * 0.705) + (Co\% * 3.252) + (Fe\% * 0.008)$ , The cut-off grade for reporting the mineral resources within the pitshell is 0.30% CuEq using total costs of US\$18/t.
3. The block model was classed into Inferred Mineral Resources for blocks with two drill holes within 400m.
4. Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. There is no certainty that all or any part of the Mineral Resources will be converted into Mineral Reserves.
5. Mineral Resources in the Inferred category have a lower level of confidence than that applied to Indicated mineral resources, and, although there is sufficient evidence to imply geologic grade and continuity, these characteristics cannot be verified based on the current data. It is reasonably expected that the majority of Inferred mineral resources could be upgraded to Indicated mineral resources with continued exploration.
6. Totals in the table may not add up precisely due to rounding differences.

# PROOF OF CONCEPT

## SAN PIETRO MINERAL RESOURCE ALREADY FITTING IN WITH THE 3 COMPARABLE LOCAL IOCG(+CO) DEPOSITS

### San Pietro (Advanced Exploration)

NI 43-101 Inferred Mineral Resource @Feb 27, 2024

**492 Mt @ 0.41% CuEq:  
0.23% Cu, 0.05 g/t Au, 99 ppm Co, 14.43% Fe**

### Santo Domingo (Pre-development)

NI 43-101 M&I Resources @Mar 31, 2024

**547 Mt @ 0.31% Cu, 0.04 g/t Au**  
(Capstone Copper Corp., [www.capstonecopper.com](http://www.capstonecopper.com))

### Sierra Norte (Pre-development)

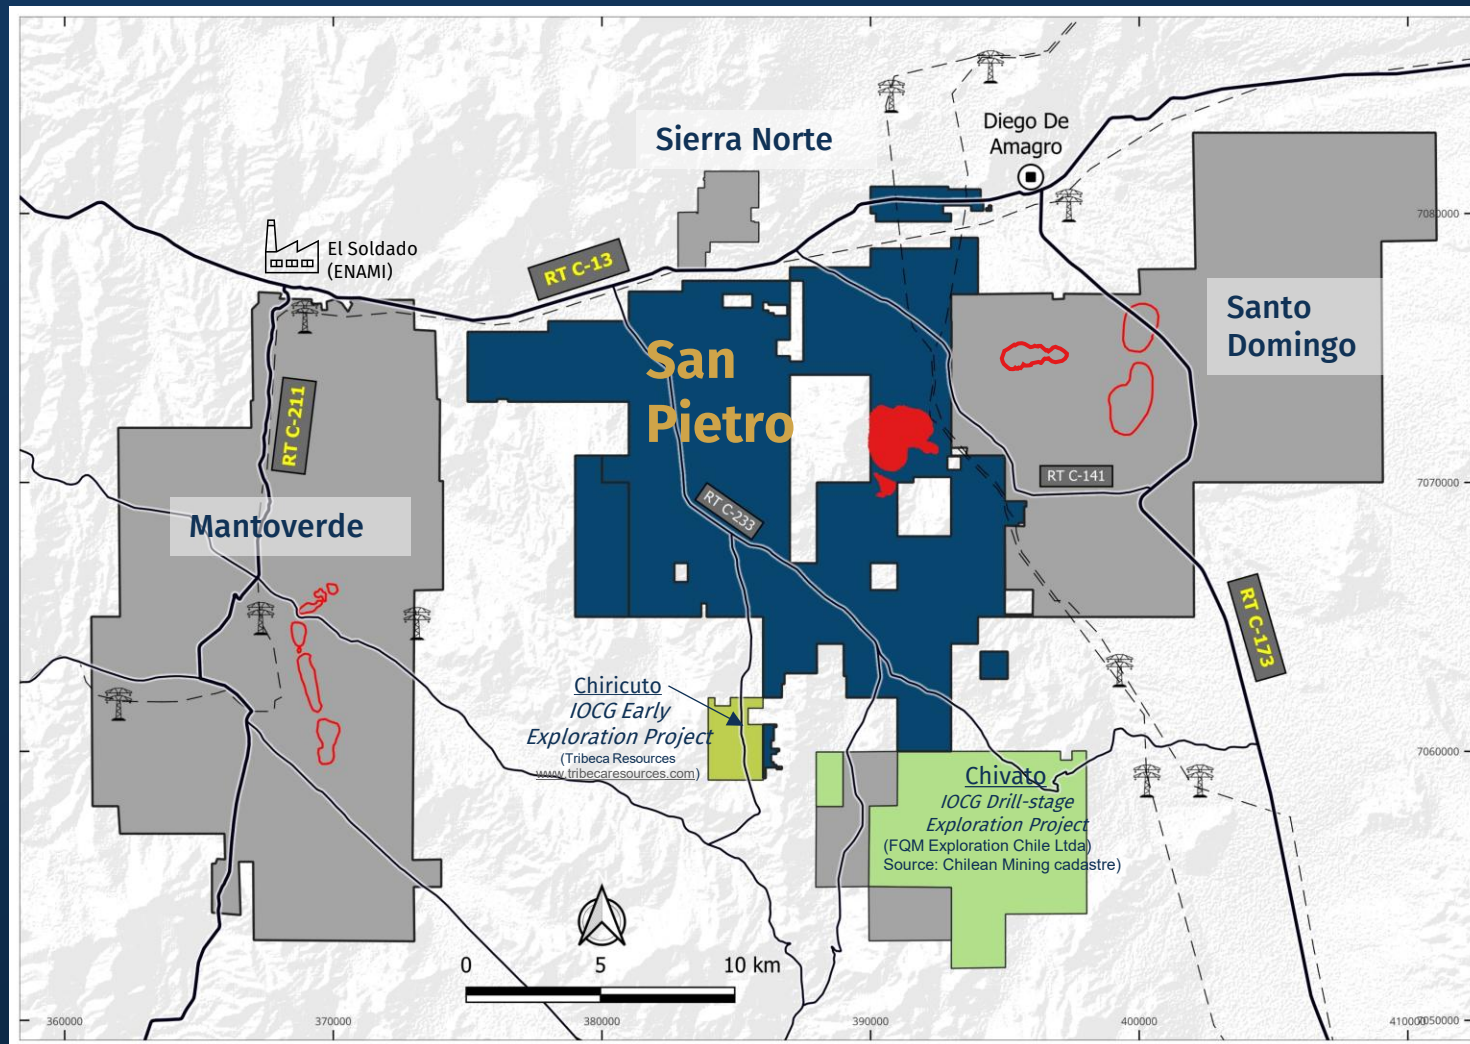

(Historic resource, non-NI 43-101 compliant)

**100 Mt @ 0.45% CuT**  
(Capstone Copper Corp. [www.capstonecopper.com](http://www.capstonecopper.com))

### Mantoverde (Producing since 1995)

NI 43-101 M&I Resources (Flotation) (Dec 31, 2023)

**528 Mt @ 0.47%Cu + 0.10 g/t Au**  
(Capstone Copper Corp., [www.capstonecopper.com](http://www.capstonecopper.com))

[Golden Arrow cautions that proximity to a mineral resource, deposit, or mine does not indicate that mineralization will occur on Golden Arrow's property, and if mineralization does occur, that it will occur in sufficient quantity or grade that would result in an economic extraction scenario. Note that Golden Arrow's Qualified Person has been unable to verify the above resource information. Note 2: property outlines are approximate.] \*492Mt grading 0.23% Cu, 0.05 g/t Au, 14.43% Fe & 99 ppm Co in the Inferred category. See Slide 13 and News Release dated February 28, 2025 details.

# RESOURCE ESTIMATE SENSITIVITY

## HIGHLIGHTS OPPORTUNITIES TO MAXIMIZE HIGH GRADE ZONES WITH INFILL DRILLING

- Analysis of the inferred mineral resource estimate shows that at a higher cut-off grade, there is substantial tonnage with higher grades of copper
- Infill drilling is expected to better delineate high grade areas, increasing confidence to include in base case

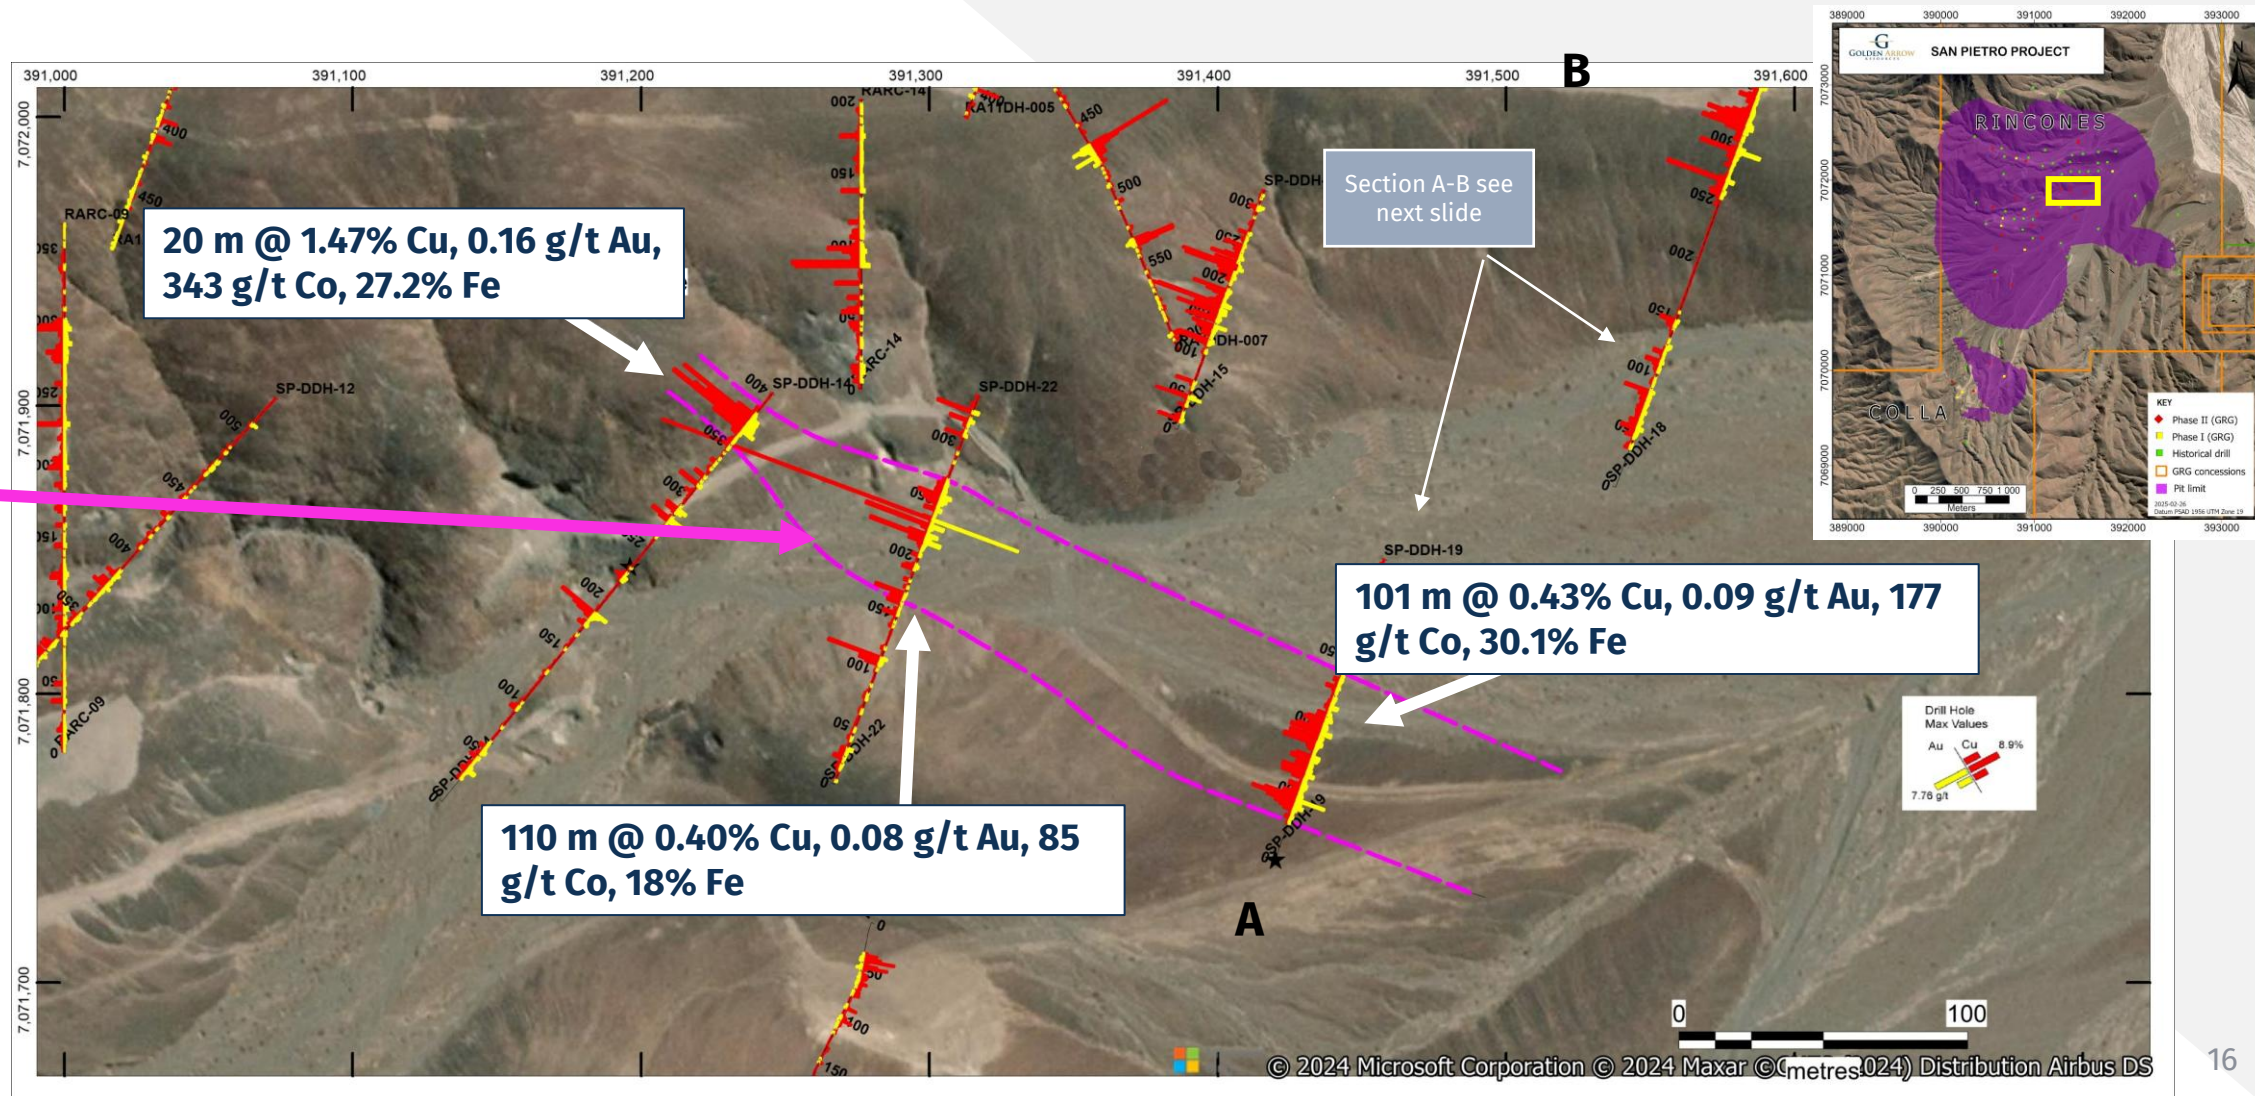

Inferred Mineral Resource Estimate Sensitivity (Abridged)											
US\$4.80/lb Cu Pitshell. Basecase is 0.3% CuEq cutoff. See Technical Report dated April 2, 2025, filed on SEDAR+.											
CuEq Cutoff %	Tonnes Mt	CUEQ %	Cu %	Au g/t	Co ppm	Fe %	CuEq Mlb	Cu Mlb	Au Oz	Co Mlb	Fe Blb
0.25	854	0.35	0.19	0.04	89	13.58	6,618	3,496	1,100,000	167	256

# RINCONES DEPOSIT: EXPANSION PLANS

Step-out drilling could add resources beyond where SP-DDH-29 already made a 400 m step-out and remains open towards Colla Deposit

[See News Release dated October 31, 2024 for full details.]

# COLLA DEPOSIT: OPPORTUNITIES

Mineralization hosted in breccia body that has been mapped up to nearly 660m to the south

- ~600m S of recent Rincones drilling
- >1.2km strike of specularite breccias hosting high cobalt and iron, plus new copper & gold sub-targets
- Target remains largely untested
- SP-DDH-25 Believed to be continuous with SP-DDH-09 160m south: **11.25m @ 483 g/t Co** at 130.55m depth (see News Release June 13th, 2023) & part of the same breccia body as CO11DH-002, located 485 m south: **32 m @ 414 g/t Co** at 116 m depth.

# MORE TARGETS & POTENTIAL FOR DISCOVERY

**Multiple targets delineated with the potential for new deposits of varying styles, including IOCG, oxide copper, high-grade gold, and iron oxide.**

## Noemi

- Coincident geology, geochem anomalies and mag anomalies with similarities to Rincones
- 800m long structure with strong gold & copper

## Lolita Norte

- 1.9km long structure with strong gold & copper

## Cerro Sur

- Recently acquired historic project with Cu & Au in drilling – old core available to be relogged & reassayed

## Mariposa

- Near-surface oxide copper prospect with confirmed mineralization at depth

## Rodeo

- High copper prospect along same structure as 2 small, 3rd party, mining operations

## Radiss Norte

- Possible extensions of Cu mineralization at depth

**>50% of Project area largely untested & some areas gravel-covered**

# San Pietro Discovery Plan

## Initial Resource Q1 2025

Mineral resource estimate for Rincones & Colla deposits & NI 43-101 Technical Report  
**(Completed)**

## Exploration & Drill Targeting Q1 - Q2 2025

Continued surface exploration to delineate new targets (**underway**).

Phase 3 drill planning (**underway**):

- Resource expansion & upgrade targets
- Exploration targets with new deposit discovery potential

## Phase 3 Drilling Q3 2025 -

Expected receipt of drill permit & commencement of **resource & exploration drilling** from up to 80 platforms (planned pending funding)

*"We are eager to continue our work as we are confident that there is plenty of potential remaining to increase the size and grades of these resources, as well as identify other deposits within the vast property holdings."* Brian McEwen, VP Exploration & Development

# Argentina Portfolio:

**+125,000ha 100%-held or Optioned Out**

- New Government policies have brought renewed attention and investment to Argentina
- **GRG is well-positioned to benefit from renewed interest with a large portfolio of projects across multiple provinces**

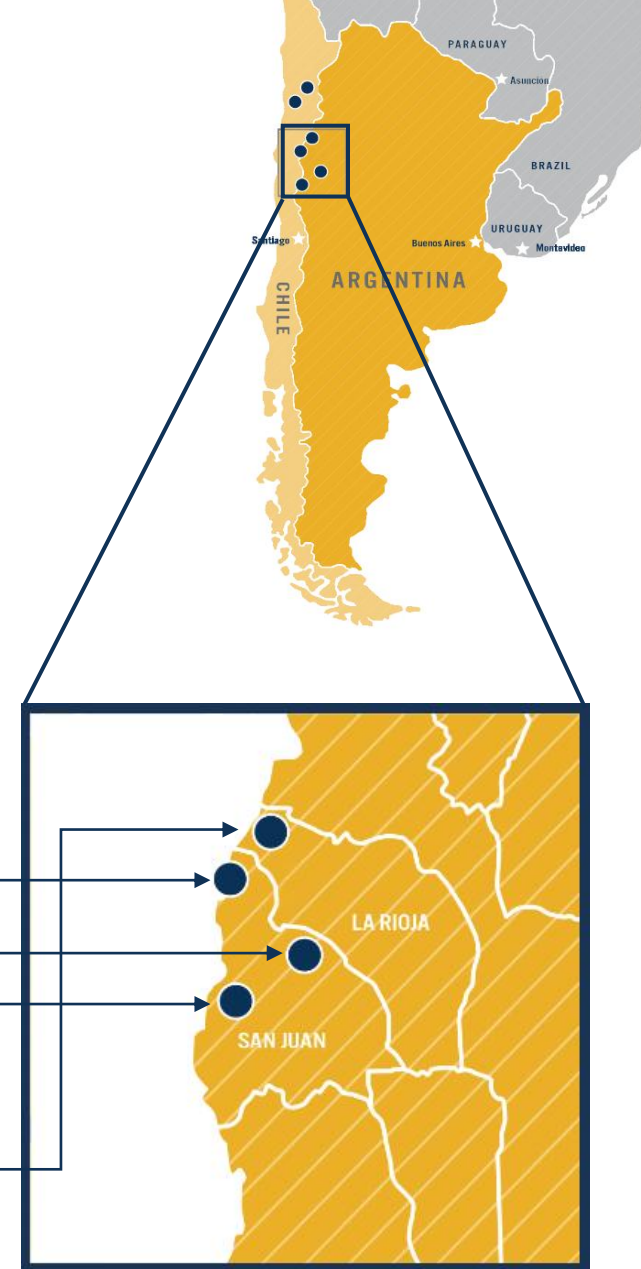

## PORTFOLIO HIGHLIGHTS:

**POTRERILLOS Gold-Silver Project** - 8km E of Veladero & Pascua-Lama

**MOGOTE Copper-Gold Project (Optioned)** – Targeting extension of Filo del Sol Discovery

**YANSO Gold-Base Metal Project** - Epithermal targets

**CABALLOS Copper-Gold Project (Optioned)** - Prospective for porphyry copper and epithermal gold-silver

[Golden Arrow cautions that proximity to a mineral resource, deposit, or mine does not indicate that mineralization will occur on Golden Arrow's property, and if mineralization does occur, that it will occur in sufficient quantity or grade that would result in an economic extraction scenario. Note that Golden Arrow's Qualified Person has been unable to verify the above resource information.]

# Argentina Portfolio Spotlight: Mogote Project

## Option to Mogotes Metals (TSX-V: MOG)

## Part of FILO SUR Cu-Au Project

- Filo Sur Project is adjacent to Filo del Sol<sup>1</sup> property (Filo Corp.) in the Vicuña District, San Juan Province
- MOG consolidating the south district, including the 8,800 ha Mogote project
- GRG optioned Mogote to MOG (previously Syndicate Minerals Pty) in 2022 & recently updated terms for MOG to earn 100% interest<sup>2</sup>:
  - C\$550,000 cash payment to GRG (complete)
  - C\$450,000 in equity private placement into GRG (complete)
  - 10,714,285 shares of MOG (~C\$1.5M value at issuance) (complete)
  - Additional C\$1.5M in cash or MOG equity to GRG within 1 year
  - 1.5% NSR
- MOG completed the previous minimum exploration expenditure requirements
- New systematic exploration completed by Mogotes including initial drilling, new target generation
